Inner City

Picking up packages from one place and deliver it to drop-off location of user. All end to end tracking is our logistical approach.

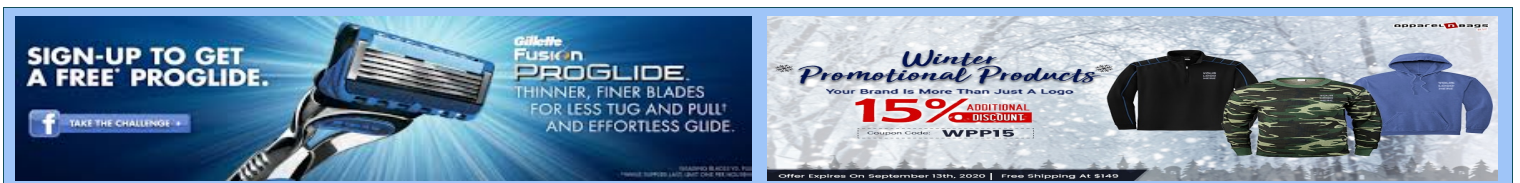

Inter City

We are focusing on the idea of sharing local as well as intercity logistical services. If somebody want to send parcel from exact location (warehouse) to next city's exact drop off point. It will involve two types of logistical approach respectively.

International Shipment

Our operations will be only dealing with picking up the parcel from marked location and deliver it to our partner's office. But the receipt will pass through us and the user will sign on that terms and conditions.
