Student

In the "My level" filter, "Native" should also appear

When you go to choose the time and day of the teacher, the calendar is not well "squared". **This error continues.**

After registering, I do not receive any welcome email, or confirmation of my email, nothing. Before if I did.

I have requested a trial class, but nothing appears in Request (it does appear in Accepted when the teacher has accepted it).

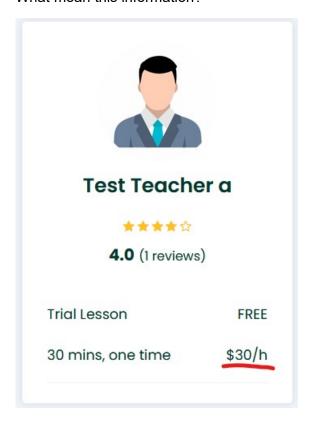

On the other hand, when requesting the test class, it does not ask me when I want it, so the teacher receives a request for a test class without day or time.

I know that the button to reserve test classes says "one time", but it allows me to reserve as many as I want. I know that people, when reading that message, should only book once ... but, a lot of people are going to give it more times than they should. It should not allow to do so.

Secondly. Each student has 3 test classes with three different teachers. Is this thought?

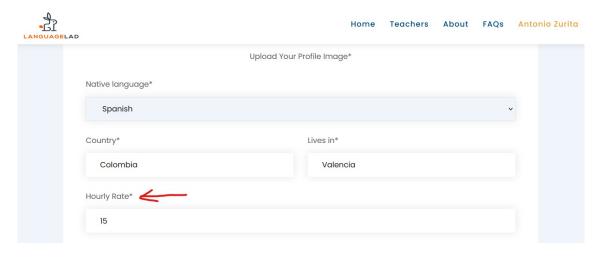

What mean this information?

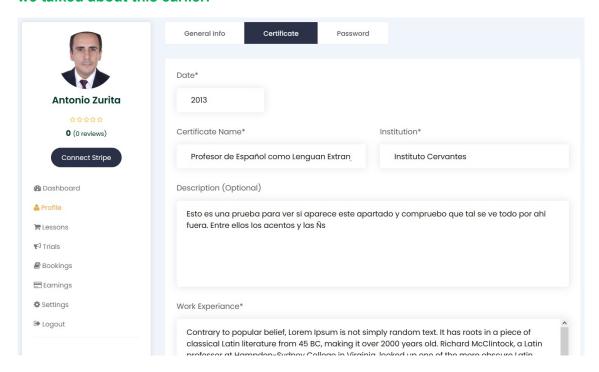

Teacher

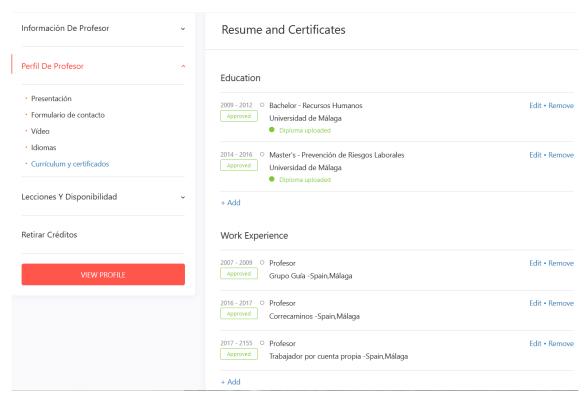

The currency that the teacher has chosen to use should appear here.

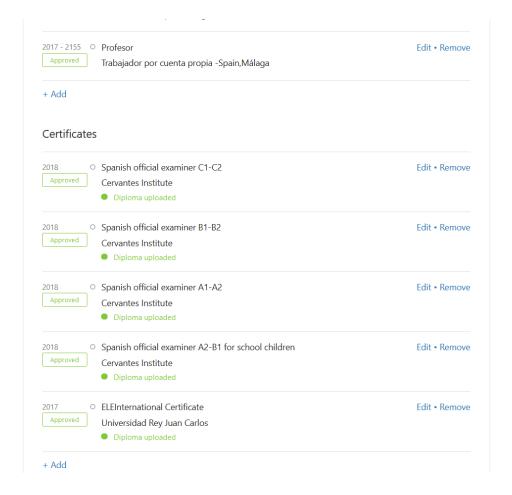

The teacher should be able to add more than one Certificate. And the Education section is missing (Certificates are not the same as University Degrees). I remember we talked about this earlier.

See how the competition has done it.

Various problems with the reservation system.

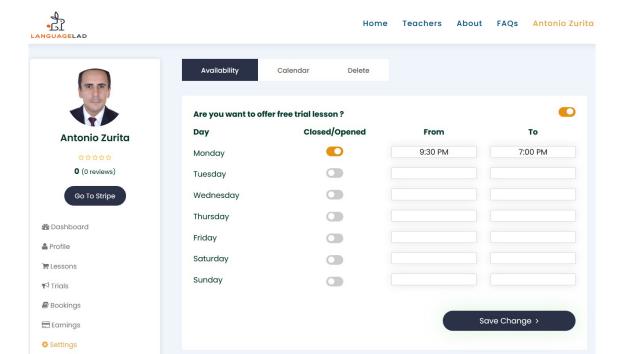

Visual:

After "Are you want to offer free trial lesson?", It seems that the schedules that you must activate are for the "Trial Lesson", and not the general schedules.

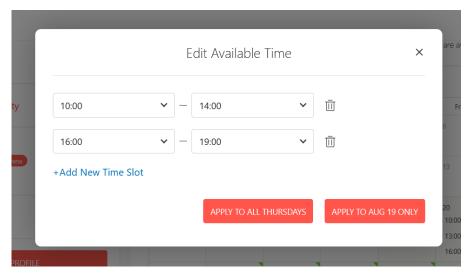

Logistics:

- 1. Teachers usually open "party" schedules, I mean, they usually activate a few hours in the morning, stop eating, and choose other hours in the afternoon, all on the same day. The option on the web does not allow you to do that. Either you choose the whole day, or just a slice, but you can't "split" it.
- 2. Also, if a teacher cannot teach on a Monday, how does he cancel that Monday without canceling every Monday?

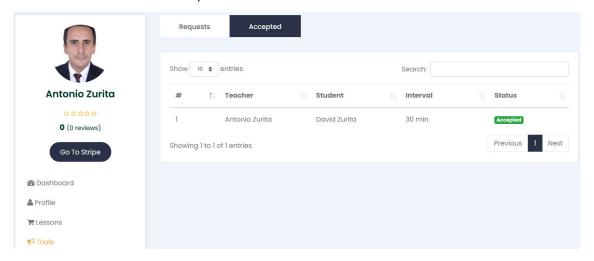

Imagine, there are 4 Mondays in the week, on Monday the 1st the teacher has reservations, on the 2nd and even on the 3rd he already has some. You want to go on vacation on Monday the 4th, but if you cancel "Monday", every Monday will be deleted, right?

Shipping captures how the competition does.

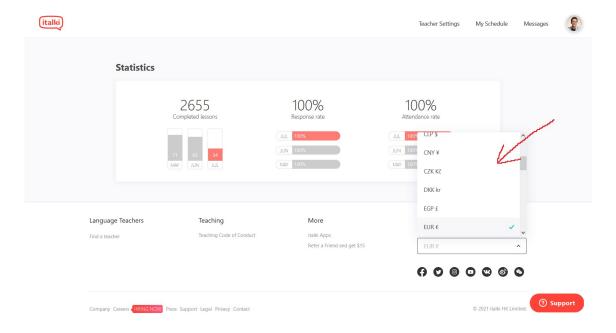

In addition to not appearing day and time of the test class (I have already commented on it in the "Student" section). How can I as a teacher cancel the test class?

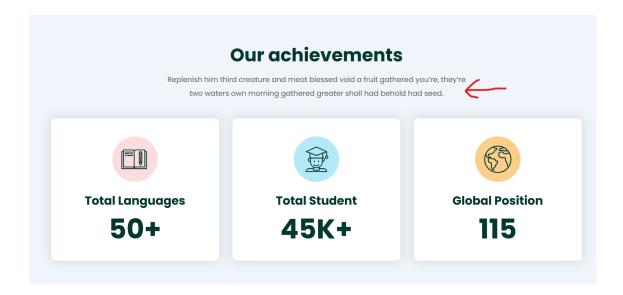

General

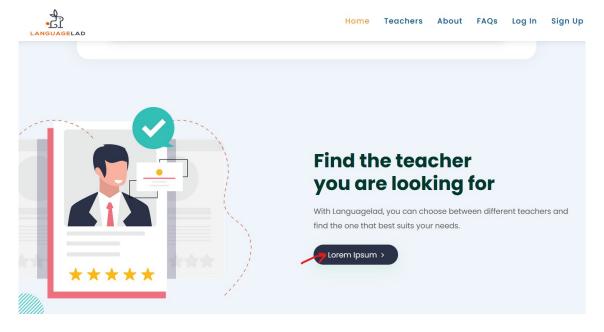

As we have already mentioned on several occasions. The website must give the user the choice of being able to see the prices in their local currency, even if everything is charged in dollars. I leave a catch, again, on how the competition does it.

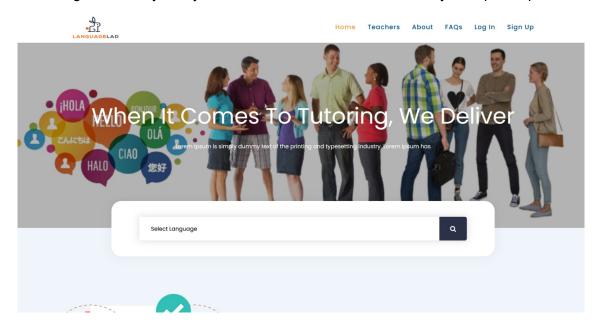

Shopping list?:)

The correct text is not written. This happens in all the buttons of the sections "Find the teacher you are looking for", "Anytime, anywhere" and "Affordable prices".

This image looks very blurry. Can I order a banner and send it to you to put it up?

Could we put some photos of some non-real students taken, for example, from an image database? Then we could go replacing them with photos and real opinions. How about?
